Khawaja Farhan Ahmed

Frontend Engineer · commercetools · Shopify Plus B2B · Next.js
Islamabad, Pakistan | +92 340 0942211 | khawajafarhan10@gmail.com | LinkedIn

SUMMARY

Frontend engineer with 4+ years building headless commerce for enterprise retail. Production experience across commercetools and Shopify (Storefront API, Hydrogen, B2B), delivering storefronts for an ASX-listed retail group, a national gas distributor, and international DTC fashion brands. Owns large features end to end and is accountable for the Pakistan-based development team.

EXPERIENCE

Software Engineer, Teamo June 2022 – Present

Remote, working with an Australia-based agency serving enterprise retail clients

- Own large features end to end across a multi-client monorepo serving enterprise Shopify and commercetools storefronts, from scoping through release.
- Built the B2B commerce layer for the **Supagas** replatform onto headless Next.js and Shopify B2B: company-level accounts, customer-specific pricing, approval and ordering flows, and order automation via Shopify Flow, replacing a limited legacy storefront.
- Built faceted search and merchandising for **Beacon Lighting Group** (ASX-listed) across thousands of SKUs, resolving commercetools price tiers through Algolia so customer-specific pricing rendered correctly across search and category views.
- Delivered Shopify Hydrogen and Oxygen storefronts on Remix for **Showpo** and **CUE**, international DTC fashion retailers shipping to multiple markets.
- Diagnosed and resolved production rendering and caching faults in Next.js 15, including a Partial Prerendering cache issue serving a placeholder route to live traffic, and a streaming-metadata bug that placed canonical tags outside the crawler-visible document head.
- Accountable for the Pakistan-based development team: peer review and merge authority on production work, technical interviews for engineering hires, and onboarding new developers.
- Integrated GA4 and Google Tag Manager across client storefronts for conversion and event tracking; applied SEO, accessibility (WCAG) and Core Web Vitals practices throughout.

Key clients: Beacon Lighting Group (Next.js, commercetools, Vercel) · Supagas (Next.js, Shopify B2B, Vercel) · Showpo (Remix, Hydrogen, Oxygen) · CUE (Remix, Hydrogen, Oxygen) · Ghanda (Next.js, Shopify) · House (Next.js, Shopify)

React Native Developer, BreakInt Pvt Ltd January 2022 – June 2022

Islamabad, Pakistan

- Built two React Native mobile applications with separate user-facing interfaces.
- Built a React admin dashboard for internal system management.
- Implemented REST APIs in Node.js and Express for backend connectivity.
